WELCOME TO OAK RIDGES LIVING

Oak Ridges Moraine The Oak Ridges Moraine is one of the most significant landforms in southern Ontario. The moraine gets its name from its rolling hills and river valleys extending 160 kms from the Niagara Escarpment to Rice Lake and was formed 12,000 years ago by advancing and retreating glaciers. The moraine contains the headwaters of 65 river systems (35 in the GTA alone) and has a wide diversity of streams, woodlands, wetlands, kettle lakes, kettle bogs and significant flora and fauna. It is one of the last remaining continuous green corridors in southern Ontario: it is still 30 per cent forested and is one of the last refuges for forest birds in all of southern Ontario.
